Dear Sir,

**RE: GEOTECHNICAL INVESTIGATION (MACKINTOSH PROBE TEST ANG HAND AUGER)
FOR SLOPE REMEDIAL WORKS**

- Contractor Performance Assessment

We refer to the above and would like to inform you that the above works undertaken by your company have been evaluated during our Contractor Approval Committee Meeting No. 42 on 17th January 2023.

We would like to inform you that the overall grading of your work performance was rated as **Good (Highly Recommended)**. This assessment was based on subsurface investigation (SI) works carried out for the above project.

In this project, most of the hand auger can only penetrate less than 0.3m due to the site condition (hard ground). However, your company has carried out additional hand auger points at offset locations as requested by the Consultant.

Overall, your company was able to carried out the abovementioned works within a satisfactory time frame and we were satisfied with the service provided to our client. We hope that you can continue to keep up your good works and continue to serve the construction industry with your exceptional quality of service.

Please do not hesitate to contact us should you require further information.

Thank you.

Yours faithfully,
G&P GEOTECHNICS SDN BHD

IR. CHOW CHEE MENG
Director
